Figure 1: BSE micrographs of the as-spun ribbons: a) L01 (Co-10W), b) L02 (Co-7.5W-10Al), c) L03 (Co-10W-8.25Al), d) L04 (Co-7.5W-12.5Al), e) L05 (Co-15W-12Al), and f) L06 (Co-10W-9.5Al). Small precipitates of B2 (black) are found in d) (L04); while both B2 and μ (white) are found in the as-spun microstructure of L05 in e). The scale bar in a) is representative of all images (i.e. the magnifications are the same).
